THE NEW STANDARD  
FOR PROFESSIONAL  
MONITOR CALIBRATION

ONE  
COLORVISION

PROFESSIONAL

ColorVision Spyder2PRO Studio sets the  
standard for professional monitor calibration  
with breakthrough technology.

# Features

## Innovative, Next Generation ColorVision Spyder2 Colorimeter

The new standard for on-screen color accuracy. Precisely calibrate your display and produce accurate ICC profiles for your CRT, LCD and laptop.

## State-of-the-Art Optical Science

Advanced photo sensors and color filter system provide a 5-fold increase in color sensitivity and consistent color readings. The new precision-molded filter pack and patent-protected light baffle produces accurate LCD display characterization.

## Sleek, Dual-Phase Hardware Design

Cutting-edge industrial design offers effortless LCD, CRT and notebook calibration.

## Multiple Monitor Calibration and Matching

Allows you to calibrate and profile multiple monitors on a single system or across an entire studio. (Mac and Windows)

## Exceptional Ease-of-Use with Wizard Software

ColorVision Spyder2PRO software walks you through the entire calibration process with its intuitive interface. Comprehensive help screens guide you through each step to achieve your desired color setting.

## Exclusive Automated Black and White Luminance Adjustments

ColorVision Spyder2PRO software automatically reads the current white and black luminance values for use in precision targeting, providing more consistent calibration results.

## Intelligent Whitepoint Correction Routines

ColorVision Spyder2PRO software automatically determines the most efficient method of white balancing for your monitor and settings.

## Advanced Features for the Professional

ColorVision Spyder2PRO software provides custom response curve targeting, colorimeter and information windows, custom targeting, ICC 2.0 and 4.0 support.

## Sophisticated Gray Balance and Tonal Response Algorithms

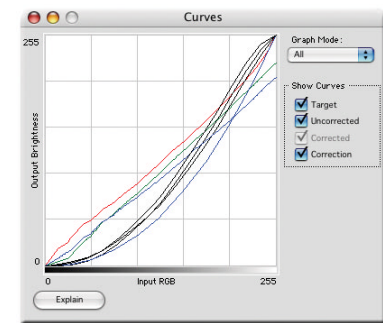

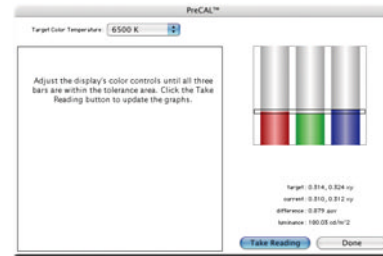

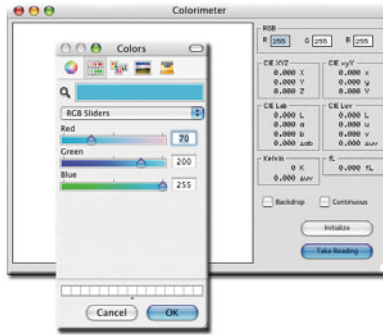

Provides demanding users with exceptionally smooth gradient steps and neutral grays.

## Unique Before and After Viewing Feature

Allows you to compare your display with and without calibration.

# Advanced Features

## Colorimeter Window

The ColorVision Spyder2PRO Colorimeter allows users to measure screen colors and take direct readings to validate color values for advanced users.

## Pre-Calibration Routine

PreCAL has long been the industry standard for precision control of RGB gain balancing and luminance adjustment. This pre-calibration routine lets users keep watch on the brightness and life expectancy of aging monitors.

## Curves

The ColorVision Spyder2PRO Curves control allows users to check the native and adjusted state of each color channel. Advanced features even allow defining custom tonal response curves.

## The ColorVision Spyder2PRO Studio includes:

- ❖ All new ColorVision Spyder2™ Colorimeter
- ❖ All new ColorVision Spyder2PRO pro-level monitor calibration software (site license)
- ❖ FREE nIK Color Efex Pro 2.0 Standard Edition software
- ❖ FREE PANTONE® colorist software
- ❖ FREE ColorVision DoctorPRO™ software
- ❖ \$75 rebate coupon for ColorVision PrintFIX™ or ColorVision SpectroPRO2™ (U.S. and Canada Customers only)
- ❖ 2-year ColorVision Spyder2 hardware warranty
- ❖ FREE technical support
- ❖ FREE software updates

System Requirements:  
CRT, LCD or notebook display(s)  
Windows® 2000 or XP  
Mac OS X10.2 or better  
USB port
